

Mrs. Brockelsby's 3 – 4 year old Class
OCTOBER

October is such a beautiful time of the year. Cooler weather and the bright colors of autumn will both play their parts in our activities this month. So make sure your child brings a jacket every day so they will have it in case it is cool when we go outside.

READINESS – We are working on left to right progression in sequencing series this month.

LANGUAGE – We will be discussing the different signs of fall and learning about Christopher Columbus.

FINE MOTOR SKILLS – We will begin working on pencil skills in addition to gluing, painting, coloring and cutting with scissors.

GROSS MOTOR SKILLS – As long as the weather is nice, we will take advantage of our playground equipment besides running and playing outside.

SCIENCE – We will notice the changing colors of the leaves and learn how pumpkins grow. Also we will be learning about squirrels and spiders.

SPECIAL CLASS – The St. Louis Zoo will be coming to the center on Wednesday, October 26th and Thursday, October 27th to conduct a class during regular classtime. They will bring some animals to see and touch.
